10 - 12. soruları verilen metne göre cevaplayınız.

A social network is a website or service where you can talk or contact with other people. You can create an online identity and upload your pictures and information about yourself on your profile page. Social networks connect people with the same interests like music, sports, cinema etc. You can make friends through these sites. You can also use them to share things with other people. Social networks are fun, but they have negative effects, too. First, you can be an addict. Second, some bad people can steal your information. So, you should learn how to use them safely. Finally, online friends can be dangerous, because they are not real friends. Be careful when you are choosing your online friends and never agree to meet an online friend in person.

10. According to the text, one of the negative effects of social networks is - - - - .

- A) addiction
