A)

B)

C)

D)

10- 12 . soruları verilen metne göre cevaplayınız.

I think we will face some problems in the future because we ruin the forests. Forests are the lungs of the earth. We should stop cutting down trees because it is very harmful for nature. Trees produce the oxygen we need. If we go on cutting down trees, the oxygen in the atmosphere will reduce. As a result of this, we will have difficulty in breathing in the future. Trees absorb the carbon dioxide in the atmosphere, so the air pollution in the atmosphere increases and it damages our bodies. There will be less food diversity if we keep destroying our forests. All in all, every part of the earth is related to each other and if we destroy one part of it, it will eventually destroy our lives.

10. According to the text, - - - - - .

A) air pollution is useful for our bodies

B) the number of the trees is increasing

C) cutting down trees is very harmful for human being

D) the carbon dioxide in the atmosphere is produced by the trees

11. If we keep destroying the forest, - - - - - .

A) breathing will be easier

B) we will have more oxygen

C) there will be less air pollution

D) we will eat less kind of food

12. Which one is not a benefit of forests?

A) to increase oxygen in the atmosphere

B) to provide food for living creatures

C) to make transportation easier

D) to decrease air pollution
